## PROFILE

I am a first-year Computer Science student with a basic understanding of web development. I have skills in HTML, CSS, JavaScript, C, React, Node.js, and Figma. I enjoy learning new technologies and improving my coding skills. I am eager to apply my knowledge to real-world projects and gain hands-on experience. I have a keen interest in building user-friendly websites and applications while continuously improving my problem-solving abilities.

## WORK EXPERIENCE

### Homy - Accommodation & Service Platform

Building a web platform that offers hostel, meal, community, and transport services for both students and corporate employees. Developed using React, Node.js, Figma, and other web technologies, focusing on a user-friendly interface and efficient service management. Enhancing skills in full-stack development, UI/UX design, and backend functionality while creating a practical solution for accommodation and daily service needs.
